Fundy Civic Centre Presents Location and Building Plan

The Fundy Civic Centre Inc. (FCC) is moving ahead with plans to construct an aquatic and fitness facility for the Sussex area. The attached site and floor plans include a 6-lane, 25-meter swimming pool, a therapy pool, fitness facility and walking track. The facility will be located just off Main Street beside the Gateway Towers apartments. The schematic design has been developed by Soucy/Ellis Architects Ltd.

“The feasibility study which was conducted in the area earlier, had asked residents what they wanted in an indoor aquatic facility. They told us their priorities were a swimming pool, swirl or therapy pool, fitness rooms and walking track,” says Karen Chantler, FCC Board Member. “We are excited, as a board, to begin the process of making their wishes a reality.”

Thanks to its modern facilities, varied programming and valuable educational opportunities, the new Fundy Civic Centre will offer a wide range of benefits to present and future generations of all ages, levels of physical and athletic, ability and financial means.

Through the Canada-New Brunswick Municipal Rural Infrastructure Fund, the federal and provincial governments have each pledged \$1.33 million in support of the project.

Also, New Brunswick’s Regional Development Corporation has offered an additional grant of \$300,000.00.

Excitement is starting to build and the fundraising committee is working hard to put their campaign together to raise the remaining funds required to build the project.
